Netskope Reporting (New Experience)

Immersive and intuitive report building

Organizations are adopting cloud and SaaS applications at a rapid pace to meet their digital transformation needs. With the explosion of applications and sensitive data moving to and from among those applications, security practitioners need to constantly monitor the key business metrics around the users, devices, applications, and data, and define security policies to defend against risks.

Why Choose Netskope?

The Netskope Reporting (New Experience) platform provides customers a highly immersive and intuitive experience of building reports that presents deep insights into the potential risks that your company and users may be exposed to while adopting the SaaS applications.

Key Features

- **Dashboard customization:** Customize the dashboards in multiple ways to suit specific business needs. Add filters to view particular types of data, provide additional context with labels, or add widgets to show additional data on the dashboards.

- **Interactive charts:** Utilize interactive charts and widgets to analyze additional details in the reports, such as live sorting via table columns and data group interaction.

- **Flexible scheduling options:** Eliminate the need for manual report creation and free up employee time through report scheduling. Automatically deliver reports in specified timelines and multiple formats to various stakeholders. All the scheduled reports are organized under a dedicated folder.

- **Executive sharing:** Seamlessly share key reports on the key performance indicators trends with executives and keep them informed on the organization's security posture.

Key Benefits and Capabilities

Prioritize Your Security Efforts
Make data-driven security decisions based on a crystal-clear understanding of what's important. With Netskope Reporting (New Experience), you can pinpoint where your team should apply their time and energy.

Work Efficiently
Save time and reduce effort by getting answers using tools designed to deeply interpret the rich visibility provided by Netskope, and navigate the relationships within the metadata.

Identify and Build Awareness Around Cloud Usage
Get insights into the sanctioned and unsanctioned cloud applications in use, the riskiness of applications, and the data movement across these applications to assess the cloud security posture.

Understand Data Exposure
Monitor the data usage trends and get a detailed summary of data movement to understand potential exposure of data across the SaaS and web applications.

Ensure Compliance Readiness
Keep a tighter grip over data movement and user activity trends to take necessary measures for protecting sensitive data in the cloud and ensuring compliance with global data protection laws.

Netskope Reporting (New Experience) provides an immersive and intuitive report-building experience.

The Netskope Difference

Netskope helps you reduce risk, accelerate performance, and provide unrivaled visibility into any cloud, web, and private application activity. To empower safe collaboration, Netskope reliably balances trust against risk with granular controls that adapt to changes in your environment. The Netskope platform protects against advanced and cloud-enabled threats and safeguards data across all vectors (any cloud, any app, any user). A single-pass architecture delivers a fast user experience and simplified operations.

Simplified Report Building	✓	X

*Tenants will be migrated over to Reporting (New Experience) starting second half of 2024; Standard Reporting (and endpoints) will be deprecated and no longer supported at the end of the year. Please reach out to your account team to learn more about early access to get a head start on the migration process.

**Predefined dashboard/widget library will continue to grow with introduction of new data collections in the future.
