

Netskope Security Cloud Operation and Administration (NSCO&A)

Delivery: Instructor Led

Duration: 3 days

Cost: 30 Netskope Training Credits

Course Date: Public class schedule at netskope.com or contact training@netskope.com for private engagements

COURSE DESCRIPTION

The Netskope Security Cloud Operation and Administration (NSCO&A) course is an in-depth training on the Netskope Security Cloud led by a Netskope expert.

In this course, you will learn how Netskope helps IT professionals gain greater visibility and actionable information about cloud services, activity, and data in your cloud.

The course begins with an introduction to the Netskope platform and the user interface. The course will then cover key aspects of the platform such as policy creation, DLP, Threat Protection, Netskope NG-SWG, securing data in the public cloud using Netskope, generating reports and analysis and other key features. The course will provide examples and hands-on practice on how to enforce policy on any one or combination of granular factors such as service, category, user, group, device, content, data loss prevention (DLP) profile, and more.

Upon completion of this course, attendees will be able to:

- Understand the unique use cases covered by the Netskope Security Cloud
- Administer Netskope in all deployment modes
- Utilize Netskope features to assess the level of Software as a Service (SaaS) risk in an organization
- Secure traffic to and from a range of websites and cloud applications
- Secure public cloud resources
- Create granular security policies
- Restrict the use of cloud applications and services to business approved providers and instances
- Investigate incidents using reporting and analytics capabilities

SCOPE

AUDIENCE	Security administrators; network administrators; sales engineers; pre-sales support; post-sales support														
DURATION	3 days														
FORMAT	Instructor Led (Virtual and In Person). Lectures and hands-on exercises														
AVAILABILITY	Public and Private On-site/Remote														
PREREQUISITES	Recommended pre-requisites: Netskope Security Cloud Introductory Online Technical Training. Additionally, some experience with the Netskope platform is preferred. Furthermore, the course is designed for attendees that have a thorough understanding of networking technologies and security concepts. Experience with other security technologies (IPS, proxy, and content filtering) is a plus.														
AGENDA	<table><tr><td>Chapter 1: Netskope Platform Architecture</td><td>Chapter 8: DLP</td></tr><tr><td>Chapter 2: User Management</td><td>Chapter 9: Threat Protection</td></tr><tr><td>Chapter 3: Traffic Steering</td><td>Chapter 10: API-enabled Protection</td></tr><tr><td>Chapter 4: Netskope Client</td><td>Chapter 11: Netskope IaaS</td></tr><tr><td>Chapter 5: Real-time Protection Policies</td><td>Chapter 12: Reporting</td></tr><tr><td>Chapter 6: Web Security</td><td>Chapter 13: Netskope Advanced Analytics</td></tr><tr><td>Chapter 7: Netskope Cloud Firewall</td><td></td></tr></table>	Chapter 1: Netskope Platform Architecture	Chapter 8: DLP	Chapter 2: User Management	Chapter 9: Threat Protection	Chapter 3: Traffic Steering	Chapter 10: API-enabled Protection	Chapter 4: Netskope Client	Chapter 11: Netskope IaaS	Chapter 5: Real-time Protection Policies	Chapter 12: Reporting	Chapter 6: Web Security	Chapter 13: Netskope Advanced Analytics	Chapter 7: Netskope Cloud Firewall
