

## Netskope One: Solve your security and network transformation challenges with one platform

Netskope One is a modern security and networking platform. Using its patented Zero Trust Engine, award-winning AI capabilities, and powerful NewEdge Network, Netskope One makes it easy for you to defend your business and protect your valuable data while delivering a phenomenal user experience.

### Architecture is critical

The “same way” of doing things to deliver security and network services simply won’t adapt to the needs of today, let alone tomorrow. Modern architecture is required to ensure all enterprise traffic stays fast and secure when everything, everywhere is online and interconnected, and threats are constant. Our unique approach enables our customers to reduce risk, accelerate access, lower costs, and simplify operations—all while ensuring no trade-offs between security and network performance.

### Consolidate. Simplify. Accelerate.

#### The Power of One

Reduce cost and complexity with the only converged platform to deliver one engine, one client, one gateway, and one private security cloud.

Reduce costs and administrative complexity by

# 50%

#### AI-Powered Visibility and Protection

Decrypt and decode all cloud, SaaS, and web user activity with patented AI innovations and the incomparable visibility and precision of the Zero Trust Engine to stop data loss and threats.

Mitigate cloud, data, and network security risks by

# 85%

#### Phenomenal User Experience

Accelerate your hybrid enterprise with the industry’s fastest and most reliable private security cloud infrastructure and proactively manage the experience from user to app and everything in between.

Boost employee engagement and productivity by

# 20%

# Netskope One

# The Netskope One Platform

Unmatched security.  
Uncompromising performance at the edge.

The Netskope One platform unifies all the core components of a modern security and networking architecture using one network, one engine, one gateway, one console, and one client.
