Netskope One DataSec Command Center

Data Sheet

Unified Data Security: Simplified, Accelerated, Actionable

Shadow data. Undetected exfiltration. Findings that sit unresolved for days. This is the daily reality for most security teams. DataSec Command Center finds what's hidden, traces what moved, and fixes what's broken. One platform. No blind spots.

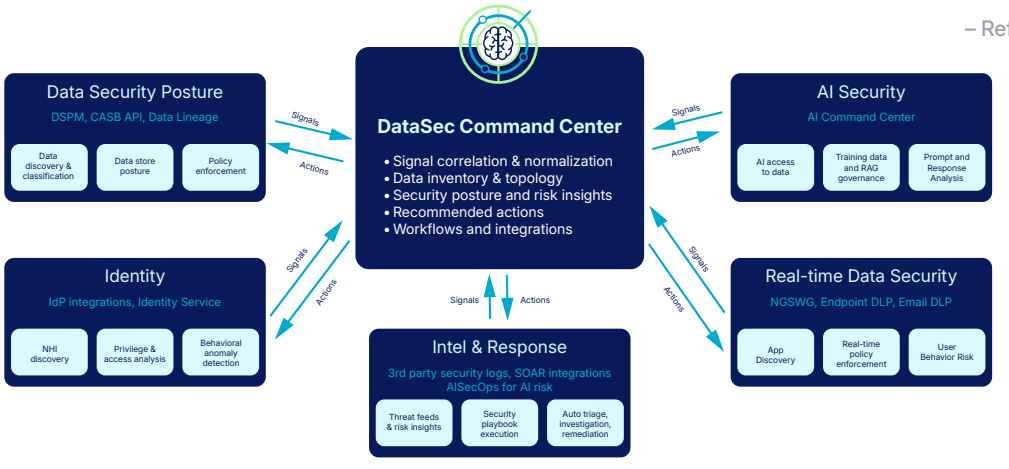

Why is Netskope the best choice?

Netskope One DataSec Command Center is the control plane that unifies data security across every environment in one workflow, from cloud, on-premises, software as a service (SaaS), AI environments, down to endpoints. DataSec Command Center builds on Netskope's proven platform, combining deep data visibility, automated investigation, and real-time policy enforcement to give organizations a clear path from risk discovery to remediation..

Key use cases:

DataSec Command Center delivers the visibility, intelligence, and control security teams need to protect data across every environment.

- **Unify the Stack:** Bring cloud, on-premises, SaaS, and other data security functions into a single console, replacing fragmented point tools with one view.
- **Uncover Hidden Risks and Accelerate Investigations:** Surface shadow data stores, unmanaged IaaS buckets, unsanctioned SaaS, and sensitive data exposure, and connect the complete data movement chain from exposure or access to potential exfiltration with full user, file, and activity context to investigate risks in seconds.
- **Remediate Risks and Orchestrate Policies:** Empower security teams to go from critical findings to resolved action using guided playbooks, recommended policy updates, and automated response workflows.

Key benefits and capabilities

Unified Visibility Across Every Environment

Discover and map data across SaaS, IaaS, PaaS, and on-premises: no blind spots, no silos.

Risk Prioritization That Tells You Where to Start

Surface the most critical risks first with an intuitive dashboard that guides teams to the right action.

Complete Data Lineage in Seconds

Trace every file movement from origin to destination, with full user, device, and context attached.

From Finding to Fix in a Few Clicks

Guided playbooks and automated workflows move teams from critical finding to resolved action without switching tools.

Consistent Policy Enforcement Everywhere

One Data Loss Prevention (DLP) engine enforces the same policies across cloud, endpoint, SaaS, and on-premises — no reconciliation needed.

AI-Powered Investigation at Machine Speed

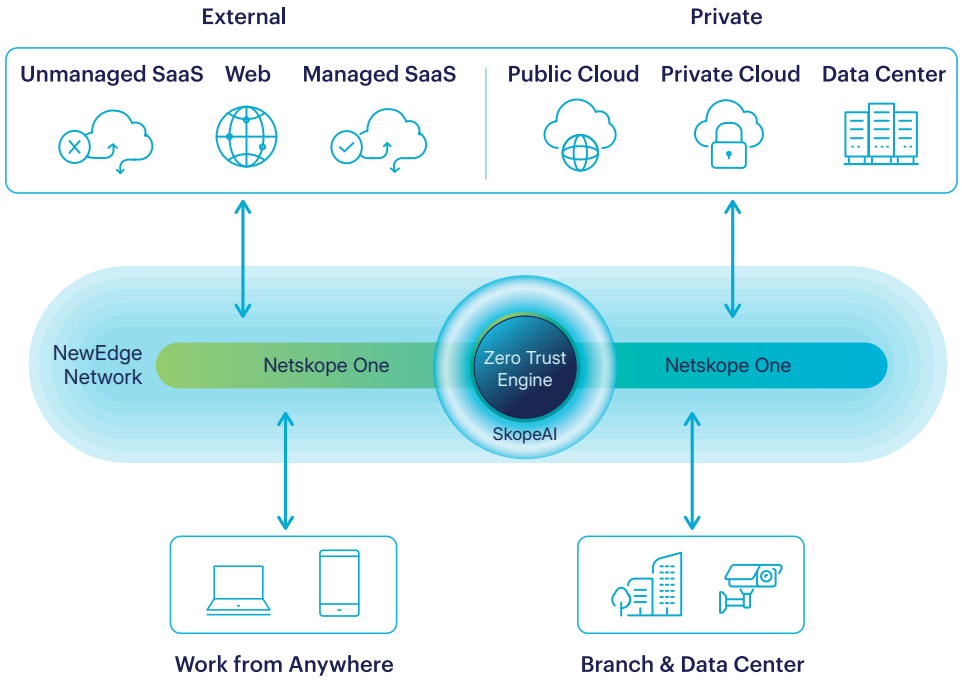

Automated triage and investigation agents handle millions of alerts, freeing analysts to focus on decisions, not data wrangling.

netskope

The Netskope difference

Netskope One is a modern, converged platform delivering security, network, and analytics services. Through its patented Zero Trust Engine, AI innovation, and NewEdge Network, one of the industry's largest and most performant private security clouds, we make it easy for our customers to defend their business and data from threats while delivering a phenomenal end-user experience.

BENEFITS	DESCRIPTION
Unified Risk Visibility	Combines Data Security Posture Management (DSPM), Cloud Access Security Broker (CASB) API, Inline/NG-SWG, and Endpoint signals into a single view of your data risk.
Contextual Risk Prioritization	Correlates user, device, data store, and AI asset signals into prioritized risk findings, improving team focus and cutting manual triage.
Guided Remediation and Response	Moves teams from find to fix with structured response workflows and recommended policy actions, reducing time to resolution without requiring context-switching between tools.
AI-Powered Security Operations (planned)	Harness agentic AI to simplify security operations with conversational guidance, complex risk analysis, automated investigations, prioritized remediation, and intelligent policy recommendations.
Integrations (current)	Integrates with Netskope One platform products including CASB, NG-SWG, and DSPM.
Integrations (planned)	Data lineage, SaaS Security Posture Management (SSPM), Endpoint DLP, AgentSkope, Email DLP, and NPA.
