Netskope Security Cloud Introductory Online Technical Training

Netskope Security Cloud enables enterprises to secure both managed and unmanaged cloud services, protect sensitive data in the cloud, and stop the most advanced online threats. Our platform empowers people with security designed for how they work without slowing them down.

Course Overview

The Netskope Security Cloud Introductory Online Technical Training learning path is the entry point for all training and is designed to give you a foundation in the Netskope suite of products and technologies. This self-paced learning is grouped into three sections: Introduction, Products and Capabilities and finally Deployment.

You will begin your learning journey with an introduction to the Netskope Solution. From there, you will learn about the products and capabilities of the Netskope Security Cloud, including Risk Insights & CCI, CASB API, Netskope Cloud Inline, Netskope Next-Gen SWG, Netskope Public Cloud Security and Netskope Private Access. The final section of this training will introduce you to the various deployment options, including Out-of-Band and Inline deployment.

Throughout these lessons, you will have the opportunity to challenge yourself with quiz questions to test your understanding of the various concepts and information that you have viewed.

By the conclusion of this learning path, you will have a solid understanding of the Netskope Security Cloud and how it secures both managed and unmanaged cloud services and protects sensitive data.

Duration

This Learning Path is comprised of 10 courses and will take approximately 4.5 hours to complete. This time will vary by the individual, however.

Completion Requirements

To complete this learning path, you must view each course fully and pass each accompanying quiz with a minimum score of 80%. Upon completion of all items within the learning path, you will receive a certificate of completion.
