

Netskope Log Streaming Service

Simplified real-time logging

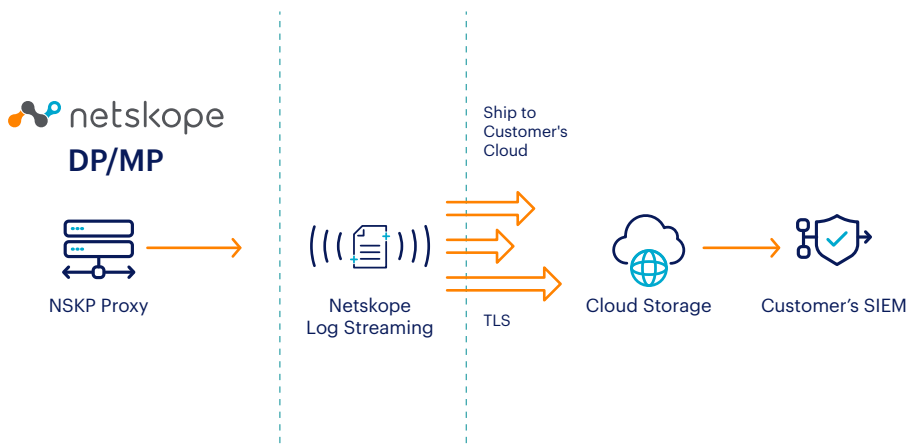

Netskope Log Streaming Service delivers real-time, secure, and scalable event data directly to your cloud storage solution. Gain visibility across users, apps, and threats, fueling faster investigations, better compliance, and smarter security decisions.

Why is Netskope the best choice?

Netskope Log Streaming Service seamlessly extends Netskope One by delivering high-fidelity, real-time event data to your SIEM or data lake. Built on Netskope's NewEdge infrastructure, it supports scalable, secure integrations that empower faster threat response, regulatory compliance, and better visibility across users, apps, and data.

Top use case at a glance:

- **Multi-cloud support:** Stream directly to **AWS S3, Azure Blob, or Google Cloud** storage
- **Real-time insights:** Events are delivered with low latency to power customers' SIEM or analytics workflows
- **Plug-and-play integrations:** Native compatibility with Splunk and Cribl via S3 connectors
- **Smart filtering:** Send only what matters with field-level filtering, reducing noise and cost.

Key Benefits and Capabilities

Reduce infrastructure complexity

Streamline operations by directly accessing Netskope logs, eliminating the need for additional infrastructure like virtual machines.

Gain real-time log insight

Access Netskope-generated logs instantly, enabling immediate analysis and rapid response to security events and operational needs.

Achieve cost-effective logging

Lower operational expenses by removing the need for dedicated log ingestion infrastructure, optimizing your security budget.

Ensure future-proof scalability

Effortlessly handle growing volumes of log data, ensuring your logging capabilities expand seamlessly with your organization's needs.

Streamline security workflows

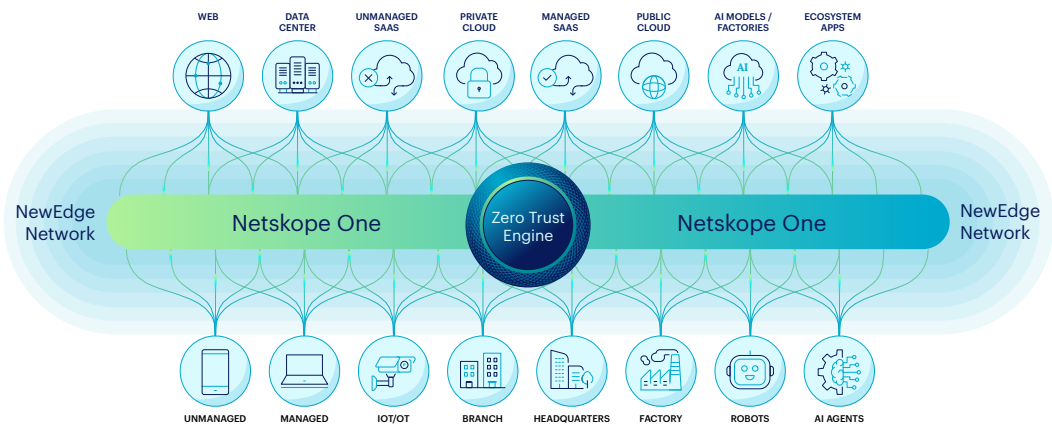

Integrate Netskope logs directly into your existing SIEM and cloud storage, simplifying management and analysis within familiar tools.

“Netskope Log Streaming dramatically simplifies access to critical security logs, empowering real-time analysis and significantly reducing operational overhead for our security teams.”

– Network Security VP, Enterprise Investment Bank

The Netskope Difference

Netskope One is a modern, converged platform delivering security, network, and analytics services. Through its patented Zero Trust Engine, AI innovation, and NewEdge, one of the industry’s largest and most performant private security clouds, we make it easy for our customers to defend their business and data from threats while delivering a phenomenal end-user experience.

YOUR NEEDS	THE NETSKOPE SOLUTION
Direct log integration	Stream logs directly to your cloud storage, eliminating separate log collection infrastructure.
Real-time visibility	Access logs instantly for real-time analysis, enabling immediate insights and rapid security response.
Enhanced scalability	Seamlessly handle growing volumes of log data without additional management or performance concerns.
Cost optimization	Reduce expenses by filtering the fields that are not required at the last-mile delivery.

Netskope, a leader in modern security and networking, addresses the needs of both security and networking teams by providing optimized access and real-time, context-based security for people, devices, and data anywhere they go. Thousands of customers, including more than 30 of the Fortune 100, trust the Netskope One platform, its Zero Trust Engine, and its powerful NewEdge network to reduce risk and gain full visibility and control over cloud, AI, SaaS, web, and private applications—providing security and accelerating performance without trade-offs.
